DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-4, 6, 9 and 10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 5, 8 and 9 of U.S. Patent No. 6,632,654. Although the conflicting claims are not identical, they are not patentably distinct from each other. In claim 1 of U.S. Pat. 6,632,654, Gebrian et al. have claimed an elongate canister comprised of a generally rectangular cross section formed by two flat sides and two narrow sides so that a generally rectangular shaped interior is formed. The instant claims recite an elongate canister comprised of a front wall, two side walls, and a 5-sided back wall forming a generally hexagon shaped interior. It would have been obvious to one of ordinary skill in the art to alter the shape of Gebrian's canister. Changing the shape of the canister to provide a 5-sided back wall would accommodate circular shaped articles. The use of circular shaped test devices is well known within the art.

Allowable Subject Matter

3. Claims 5, 7 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
